AEROMAT COOL

BENEFITS

- TOP ENERGY EFFICIENCY
- **ABSOLUTE CONSISTENCY IN** PROCESSES & PRODUCTS
- 3. CAPTIVATING QUALITY
- OUTSTANDING HYGIENE

FLOW CONDITIONS

order produce top-quality product of consistent quality in the shortest posthe same climatic and flow condisible time, prevail throughout the whole chamber. tions

The radial fan circulates the whole chamber volume several times a minute at intervals adapted to suit the process, guaranteeing that a perfect product with consistent quality always results. In addition, the tried and tested air change flap system ensures dynamic circulation of air around the product, achieving greater consistency.

products Each of your runs through critical cooling range temperatures between 40 °C and 15 °C especially quickly and steadily.

OPTIONS

COOKING FACILITY

The cooking facility, which is used to sterilize the installation chamber as well as cook the products, allows cooking with steam.

FULLY AUTOMATIC CIP-SYSTEM

The fully-automatic central cleaning system with rotating nozzles in the chamber achieves the best possible hygiene. A foam pump is also available as an option.

MICROMAT ANALYZER

The system reduces complex production processes and a wide-ranging distribution of installation components to a reliable & convenient general overview for the operator.

ETHERNET CONNECTION

Messages are e-mailed to a defined e-mail distribution list.

TYPE OF COOLING

The Installation can be designed for the cooling media liquid ammonia, freon or glycol.

AUTOMATIC CEILING CONVEYOR

As an alternative option to the automatic conveying of floor-running trolleys, we also offer automatic conveying of suspended trolleys.

AUTOMATIC FLOOR CONVEYOR

If you select the automatic floor conveyor and the transit design, you have the option of largely automating your AEROMAT.

COLD-WATER CIRCULATION SYSTEM

An energy-saving recycling system for packed products in a water-impermeable casing, in which cold shower water is conditioned and returned to the process.

DOOR VARIANTS

We supply fully-automatic rising/falling doors, rolling doors or transit design doors for a variety of requirements.

An automatic door-opener ensures that the chamber is ventilated after the process and that water drains out of the installation chamber.

TECHNICAL DATA

Our installations are available as single or double row installations.
